Central Communications & Electronics, Inc.

Broadband Internet Access Services Network Management Practices, Performance Characteristics, and Commercial Terms and Conditions

Open Internet Disclosure Statement

Central Communications & Electronics, Inc, (the Company) provides this information in good faith effort to comply with the disclosures required by the Federal Communications Commission (FCC) revised 'transparency' rule.

Central Communications & Electronics, Inc. is a fixed wireless Internet provider providing wireless internet services to the citizens and business of Schleicher County, Texas.

These practices, characteristics, terms and conditions are intended to help preserve the Internet as an open framework that enables consumer choice, freedom of expression, end-user control, competition, and freedom to innovate without permission, while permitting the Central Communications & Electronics, Inc to manage the network reasonably.

Network Management Practices

Central Communications & Electronics, Inc. manages the company network with the goal of providing the best practicable broadband Internet experience to all of Central Communications & Electronics, Inc. customers.

Within the scope of Central Communications & Electronics, Inc. resources, we attempt to deploy and maintain adequate capacity and facilities within our own network and to have sufficient capacity of facilities outside the company's service area.

1. Congestion Management Practices

Central Communications & Electronics, Inc. does not implement any congestion management techniques. In the event of congestion on our network, all traffic is classified as best effort.

Congestion may be caused by capacity limits and bottlenecks in our network or by limitations in the capacity of incoming transport facilities provided by other internet carriers.

To the best of our knowledge, Central Communications & Electronics, Inc. has not experienced recent problems with congestion.

If significant congestion problems arise in the future, Central Communications & Electronics, Inc. approach is to determine the source of the problem and to increase the capacity of the affected portions of our network.

2. Application-Specific Behavior Practices

Central Communications & Electronics, Inc. does not favor or inhibit certain applications or classes of applications.

Customers may use any lawful and commercially available applications which they desire on Central Communications & Electronics, Inc.'s network.

Our company does not normally monitor the contents of the traffic or applications of our customers.

Central Communications & Electronics, Inc. undertakes no obligation to monitor or investigate the lawfulness of the applications used by our customers.

If any party contacts us with a substantial allegation that an application being used by a customer is unlawful, we will investigate the matter (including consultation, as it deems appropriate, with attorney, consultants, federal or state regulators, and/or federal, state or local law enforcement agencies), and will take appropriate actions to deal with the use of applications that are demonstrated to be unlawful.

Customers may develop their own applications. Central Communications & Electronics, Inc. will not prohibit the use of customer-developed or modified applications unless there is a reasonable belief that the application will cause harm to our network.

Central Communications & Electronics, Inc. does not block or rate-control specific protocols or protocol ports.

Central Communications & Electronics, Inc. does not modify protocol fields in ways that are not prescribed by applicable protocol standards.

3. Device Attachment Rules

Central Communications & Electronics, Inc. does not have any approval procedures that must be satisfied before a device can be connected to our network.

Customers may use any lawful, compatible, type-accepted and commercially available device on our network, as long as there is no harm to the network.

Central Communications & Electronics, Inc. does not monitor the devices used by our customers and undertakes no obligation to monitor or investigate the lawfulness of the devices used by our customers.

If any party contacts us with a substantial allegation that a device used by a customer is unlawful, Central Communications & Electronics, Inc. will investigate and take appropriate action.

4. Security Practices

Central Communications & Electronics, Inc does not normally monitor the traffic of our customers.

Our customers are free to obtain anti-spam and/or anti-virus software or services from any source they desire, as long as such software or services do not disrupt or degrade the traffic of our other customers or harm our network.

In the event of Denial of Service (DOS), Distributed Denial of Service (DDOS) attack, spoofing or other malicious traffic, Central Communications & Electronics, Inc will implement inbound and outbound filtering on specific hosts.

5. Traffic Blocking

Central Communications & Electronics, Inc. does not block any lawful content, applications, devices, and/or non-harmful devices.

The only potential exceptions where blocking may occur would be unlawful or harmful circumstances.

Central Communications & Electronics, Inc. does not knowingly impair, degrade or delay the traffic on our network.

Congestion may from time to time impair, degrade or delay some traffic.

Central Communications & Electronics, Inc does not charge edge service providers of content, applications, service and/or devices any fees simply for transporting traffic between them and their customers.

6. Performance Characteristics

Latency is another measurement of the Internet performance. Latency is the time delay in transmitting or receiving packets on the network.

Latency is primarily a function of the distance between two points of transmission, but also can be affected by the quality of the network or networks used in transmission; and the distance a customer is located from our access points.

Because conditions on these facilities and routes can change frequently, Central Communications & Electronics, Inc. can provide estimated actual access speed and latency information only for specific recent time periods requested by customer.

Central Communications & Electronics, Inc. internet is suitable for real-time applications. The speed a customer subscribes to will impact the efficiency of the real-time applications.

For any other concerns concerning performance contact Central Communications & Electronics, Inc.

7. Specialized Services

Central Communications & Electronics, Inc. does not offer specialized services to end users.

8. Commercial Terms and Conditions

The commercial terms and conditions of Central Communications & Electronics, Inc.'s. Broadband Internet Access Services are available at the business office as show in Paragraph D below or by request.

A. Pricing

Central Communications & Electronics, Inc. offers different levels of service offerings that change as we continue to build out our network.

Pricing and service offering are available by contacting the business office.

Central Communications & Electronics, Inc does not impose fees for early termination.

Central Communications & Electronics, Inc. does not impose usage-based fees upon certain tiers or levels of our service.

B. Discrimination

Central Communications & Electronics, Inc. does not impair, degrade or delay VOIP applications or services.

Central Communications & Electronics, Inc. does not impair, degrade, delay or otherwise inhibit access by Central Communications & Electronics, Inc's customers to lawful content, applications, services or non-harmful devices.

Central Communications & Electronics, Inc. does not impair free expression such as slowing traffic from websites or blogging sites.

Central Communications & Electronics, Inc does not require or demand pay for priority that directly or indirectly favor some traffic over other traffic.

Central Communications & Electronics, Inc. does not prioritize our own content, application, services or devices.

C. Privacy

Central Communications & Electronics, Inc. network management practices do not generally entail inspection of network traffic.

Central Communications & Electronics, Inc. does not collect, store or use traffic information to profile our customers in order to sell additional services to them, or for similar non-network management purposes.

D. Redress Options

Questions and complaints from consumers, entrepreneurs, and other small businesses should be addressed to Central Communications & Electronics, Inc at Telephone # 325 853-1049 or by visiting our Schleicher County office located at 710 North Divide, Eldorado, Texas 76936.
